

The Extension Unit for **Automated Extraction**

- Universal take-out unit for your injection molding machines
- Various robot configurations can be used
- Can be integrated to ZAHORANSKY AG's automation / packaging solutions

SYSTEMS TECHNOLOGY

The solution for automated take-out straight from injecting molding machines

- Universal take-out unit
- Suitable for injection molding machines (50 – 200 t, larger sizes on request)
- Various robot configurations can be used
- Down stream extension solution including safety housing
- Can be integrated to automation / packaging solutions
- One-stop service

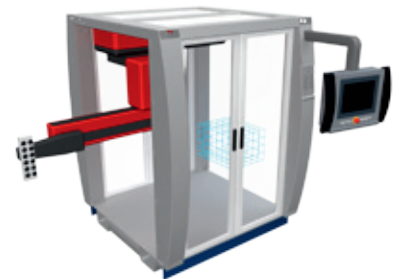

Three versions

Z.SIROC overhead

Z.SIROC vertical

Z.SIROC sideload

Facts

- Agilus 6-axe robot from Kuka
- Cost effective standard usage
- Take-out speed: 1 sec.
- Designed for up to 10 kg

Facts

- 6-axe robot from Kuka
- Complete movement
- Combined insertion and take-out
- Designed for up to 16 kg

Facts

- Linear handling
- Compact high performance high efficiency entry
- Rapid take-out speed
- Designed for up to 2 kg

Greater Efficiency through Integrated Automation

As far as improving production efficiency in injection-molding processes is concerned, integrating the upstream and downstream working steps cannot be avoided. This is precisely where ZAHORANSKY Systems Technology's strength lies. Our specialists develop innovative concepts, modules and solutions for the integrated automation of injection molding production processes with dedication and tenacity – specifically for the manufacture of plastic products in the consumer, medical technology and cosmetic sectors.

ZAHORANSKY – PERFECTLY DIFFERENT
